

**Liquid soap dispenser
0,75L**

 Article: **9075B**
Description:

- Soap dispenser with content of 0.75 l
- For a variety of uses (at home, in workshops, schools, kindergartens, public institutions etc.)
- One filling provides as much as 950 washes
- High durability materials are used in the process of manufacturing
- Quality made product

Materials used:

- Polycarbonate (PC)
- Acrylonitrile butadiene styrene (ABS)

Dimensions / install: Dim. \pm 2%, [mm]

- Drill four holes in the desired location on the wall with a diameter of 6mm, with spacing 60mm and 150mm
- Mount with four screws 4 x 40mm
- Re-filling: insert the key into the hole on a soap dispenser, open the lid and pour the liquid soap

Atests:

- In general construction there are no demands for testing bathroom accessories

Maintance / cleaning:

It is recommended to periodically clean the products in order to maintain their long-term attractive appearance.

The parts in contact with water should be wiped with a soft cloth to prevent the accumulation of limestone.

Clean normally using liquid soap mixed with water.

FOR STAINLESS SURFACES:

If the surface is exposed to aggressive environments, such as high humidity, salt (vicinity of the sea), chlorine (pools), hard water, etc., it requires additional cleaning with a cleaning agent containing silicone.

MAINTENANCE AND CLEANING TIPS

Dirt and limestone accumulating around glass beams and other parts can be removed with a water and vinegar mixture (cca. 10ml in 1 litre of water).

Thereafter wash the elements using liquid soap and sponge and rinse with clean water.

CAUTION

It is not recommended to use liquid cleaning products with sharp particles or cleaning products containing chlorine acid, bleach, ammonia, acetone, acid for home use, different disinfectants, cleaning vinegar, or rough cleaning sponges and sponges made of steel wool.

The use of these products can permanently damage the surface. In this case, the manufacturer will not assume responsibility for any damage.
