# Geometric Parquet

We went wandering before we went designing.

Across continents and climates, through forests that whisper in the wind and landscapes where time carves poetry into bark, the design journey began. From the rugged skin of ancient oaks to the soft, sun warmed textures of Scandinavian timber, we studied wood not as material but as memory. Every grain, every scar, every subtle shift in tone told a story of endurance and elegance.

The Rocell Decorative Wood Collection, crafted in a versatile 60x60cm format, distills that global inspiration into a surface that feels alive. It carries the quiet drama of tree bark, the organic rhythm of natural growth rings, and the warmth of timber aged gracefully by the elements. Yet it performs with the precision and resilience of modern innovation designed for contemporary living.
